

Mountain Snow™

PIERIS

Pieris japonica 'Planow'

New bronze foliage matures to dark green; pendulous buds appear in summer and last through winter before opening in early spring with beautiful ivory flowers. More heat tolerant than other Pieris.

EXPOSURE	USDA ZONES	SUNSET ZONES	DIMENSIONS
Part shade to shade	Hardy to -25°F, zones 4b-9	2b-9, 14-17	3-4 ft Height x 2-3 ft Width

Feature

Clusters of white blooms

Benefits

More heat tolerant than other Pieris, Deer Resistance

Growth Rate

Slow

Water

Medium water needs

Soil

Well-drained acidic soil

Fertilizer

Feed with acid fertilizer after bloom

Pruning

Shape after spring bloom
